PROFESSIONAL SUMMARY

Consultant and Full-Stack Developer with 5+ years of experience delivering enterprise-grade solutions across Angular (9+), Java/Spring Boot, Node.js, GraphQL, and Elasticsearch ecosystems. Recognized for optimizing mission-critical RTFC processing to 460 TPS, delivering award-winning solutions on Codexa architecture, and driving 30+ Non-Functional Requirement (NFR) initiatives focused on performance, scalability, reliability, and operational readiness. Proven track record supporting global financial institutions including HSBC, NAB, CIBC, RBC, and SocGen through large-scale migrations, production support, accessibility compliance (WCAG 2.1), and zero-defect releases. Experienced in mentoring development teams, resolving critical client escalations, and leading cross-functional delivery from development through production rollout.

TECHNICAL SKILLS

Frontend: Angular 9+, including Angular 14 and 16, TypeScript, JavaScript, HTML5, CSS3, WCAG 2.1

Backend: Java 17, Spring Boot, Node.js, REST APIs, GraphQL, Microservices

Databases: MySQL, PostgreSQL, Oracle, Elasticsearch

DevOps & Cloud: CI/CD, Jenkins, Kubernetes (working familiarity), AWS (working familiarity), Docker, Maven, SonarQube

Tools & Frameworks: Hasura, Olive Framework, Codexa, Git/GitHub, Kibana, Grafana

AI-Assisted Development: Cursor, Claude, AI-assisted code analysis, debugging, refactoring, solution design, code generation, and developer productivity

Other: Agile/Scrum delivery, Performance Optimization, Code Review, Team Leadership

PROFESSIONAL EXPERIENCE

Consultant

Intellect Design Arena Ltd.

July 2025 - Present

- Optimized RTFC (Real-Time Fund Check) processing through application and database query tuning, achieving 460 TPS while maintaining system stability and existing functionality.
- Contributed to successful retrofitting of codebase from version 24 to 25, ensuring seamless transition, system stability, and zero downtime; managed post-release defect resolution by providing critical support and fixes.
- Delivered **12 critical CIBC Sweep Inquiry UJs** by rapidly mastering the Codexa architecture and overcoming framework limitations through custom solution design. Standardized development approaches, mentored team members, and ensured a successful zero-defect release, earning a **Spotlight Award** for outstanding delivery and technical leadership.
- Served as a key technical resource for teams utilizing **Codexa-generated Angular 14 and Java 17 services**, providing debugging, root cause analysis, and guidance for unsupported configurations. Collaborated with developers across projects to recommend alternative implementations and accelerate issue resolution.
- Driving 30+ Non-Functional Requirement (NFR) initiatives focused on performance, scalability, reliability, maintainability, and operational readiness across product modules.

Associate Consultant

Intellect Design Arena Ltd.

July 2023 - June 2025

- Provided technical and functional support for the CFF product, resolving critical issues and enabling successful presales demonstrations for multiple clients.
- Led proactive testing, UAT, and pre-production support for HSBC, resolving critical issues and ensuring deployment readiness.
- Delivered SIT support for CBOS-22 Hasura upgrade across SOCGEN and RBC, ensuring compatibility and functionality in diverse environments.
- Deployed on-site support at HSBC during critical project phases, providing real-time technical assistance and issue resolution.
- Executed Node.js version upgrades for NAB, ensuring seamless transition with zero data loss.
- Supported HSBC migration team across pre-production and production phases, successfully executing production migration in July 2024.
- Owned end-to-end post-production support for HSBC, independently resolving critical issues and developing change requests (CRs) to ensure system stability and client satisfaction.

- Transitioned to RTFC (Real-Time Fund Check) product development, developing expertise in the Olive framework (internal) and Java 17, and delivering multiple modules end-to-end.
- Mentored team members on product functionality, implemented vulnerability and X-ray scan fixes, and contributed to NFR section for RTFC processing.

Project Engineer

Intellect Design Arena Ltd.

June 2021 - June 2023

- Resolved frontend SIT issues and played a key role in achieving WCAG 2.1 compliance for HSBC within the Liquidity CBX-FO product team.
- Expanded into Node.js backend development, gaining expertise in GraphQL and Elasticsearch 7, and delivered multiple change requests (CRs) end-to-end on schedule.
- Resolved UAT issues and enabled successful production go-live for clients including BBL, NAB, and FTB.
- Optimized Node.js backend services for HSBC, significantly improving system efficiency and response times.
- Led a UI team of 2–3 new joiners on the CFF internal project while independently managing Node.js backend services, successfully developing and delivering critical modules.

AWARDS & RECOGNITION

- Quarter 1 Spotlight Award (2026): Recognized for delivering 12 critical CIBC Sweep Inquiry UJs through rapid adoption of Codexa architecture and innovative problem-solving.
- Spot Award (Dec 2024): Awarded for exceptional HSBC production support, RTC issue resolution, and ownership of complex change requests.
- Sergey Bubka Award Nomination (Sep 2024): Organization-level nomination for Individual Excellence as Best Support Engineer (FY 2023-24).
- Special Recognition (Mar 2024): Honored for outstanding contributions and impactful project delivery.
- Spot Award (May 2022): Recognized for timely deliverables and significant contributions to the CBX-S project.
- Spot Award (Dec 2021): Awarded for driving WCAG 2.1 compliance initiatives and key HSBC feature enhancements.
- Spot Award (Aug 2021): Recognized for proactively resolving critical accessibility issues while managing multiple high-priority deliverables.

EDUCATION

Bachelor of Engineering in Mechanical Engineering

Sinhgad Academy of Engineering, Pune | CGPA: 8.16

GATE Qualified (Mechanical, 2020)

PERSONAL PROJECTS

Paramatrix Tech | HTML/CSS/JavaScript

Live Site: paramatrix-tech-in.github.io

- Developed a responsive business website with modern UI and optimized user experience.

Inventor App Frontend | Angular 16

GitHub: github.com/Nikhilkumbhare97/inventor-app-frontend

- Built a modular Angular application using reusable components and modern architecture patterns.

CERTIFICATIONS / TRAINING

Hands-on Programming and Git Skills – BridgeLabz, Feb 2021

Linux Terminal Commands – BridgeLabz, Feb 2021
